### **Can time .... Logger time Sterilization and Pasteurization of Fruit and Vegetables**

INGOLSTADT – (September 26, 2012) – Just in time for the fruit and vegetable harvest, ebro launches the improved EBI 11 data logger with mechanical brackets for all casks. The temperature and pressure logger with dimensions of Ø 16,5 mm x 24 mm is one of the smallest on the market to fit within many different packagings. In production or in quality control, the device enables the user to evaluate sterilization and pasteurization processes by core temperature measurement and to displaying it with the help of the Winlog.pro software. With a fast  $F_0$  value calculation, a high product and quality security is ensured.

With an accuracy of  $\pm 0.1$  °C and a measurement range of -30 °C to +150 °C with the temperature logger and 0 °C to +150 °C with the temperature / pressure logger, the data logger can be used for the complete scope from a deep temperature check to a sterilization process. With 15,000 measurements and a sample rate from one second to 24 hours, there is enough capacity for nearly all processes. The logger has the protection class IP 65, and the batteries can be replaced by the user.

Adapters for glasses, cans or plastic packaging are available as standard items, or they can be developed for custom applications.

### **About ebro Electronic**

ebro Electronic GmbH is a fast growing, innovative manufacturer of electronic instruments that are used in food, medicine and pharmacy. As a division of Xylem- a company headquartered in the U.S. with over 12,000 employees worldwide and over \$3.2 Billion in annual revenues in 2010, ebro sells its range of proprietary temperature, pressure and other instruments in over 100 countries.

## NEWS RELEASE

### **About Xylem**

Xylem (XYL) is a leading global water technology provider, enabling customers to transport, treat, test and efficiently use water in public utility, residential and commercial building services, industrial and agricultural settings. The company does business in more than 150 countries through a number of market-leading product brands, and its people bring broad applications expertise with a strong focus on finding local solutions to the world's most challenging water and wastewater problems. Launched in 2011 from the spinoff of the water-related businesses of ITT Corporation, Xylem is headquartered in White Plains, N.Y., with 2010 annual revenues of \$3.2 billion and 12,000 employees worldwide.

The name Xylem is derived from classical Greek and is the tissue that transports water in plants, highlighting the engineering efficiency of our water-centric business by linking it with the best water transportation of all -- that which occurs in nature.
