NEW: External Probes for ebro USB Data Loggers

INGOLSTADT – (May 14, 2014) – The new external probes for the USB data loggers EBI 300 and EBI 310 from ebro Electronic are available now! The external capacitive humidity probe TPH 400 is used together with the EBI 300 standard USB data logger and measures the humidity between 0% and 100%. The external capacitive humidity probe TPH 500 and the external 2-channel temperature probe TPX 310 are suitable for use with the high-precision EBI 310 USB data logger. With the TPH 500 the humidity between 0% and 100% is measured. The 2-channel probe TPX 310 was developed for precise temperature measurements with an accuracy of up to ± 0.2 °C. A special feature: two external probes can be connected to the TPX 310 which cover a range of a total of -200 °C to +400 °C (-328 °F to 752 °F), depending on probe type. In addition, all software versions of the Winlog application programs have been updated to support the new probes.

The easy to use data loggers EBI 300 and EBI 310 with USB port monitor the temperature and / or humidity during transport and storage of sensitive goods such as medicines, foods, vaccines, etc. An outstanding feature of the USB data loggers is the automatic PDF creation with all the important measurement data. At the end of the measurement the data loggers are easily connected to the USB port of a PC and the measured values appear in a detailed report as a PDF file on the screen. There is no additional software needed and the PDF report can immediately be saved, printed or sent via e-mail.

Please find more information at www.ebi300.com under accessories or in our online shop at shop.ebro.com.

About ebro Electronic

ebro Electronic is a fast growing, innovative manufacturer of electronic measurement instruments that are used in food, medicine and pharmacy. As a business unit of Xylem's WTW GmbH, ebro sells its range of proprietary temperature, humidity, pressure, oil quality, and other instruments in over 100 countries. Xylem is a company headquartered in the U.S. with over 12,000 employees worldwide and over \$3.8 Billion in annual revenues in 2012 that produces superior quality pumping, water treatment, and analytical instrumentation.

Please find more information at www.ebro.com.

About Xylem

Xylem (NYSE: XYL) is a leading global water technology provider, enabling customers to transport, treat, test and efficiently use water in public utility, residential and commercial building services, industrial and agricultural settings. The company does business in more than 150 countries through a number of market-leading product brands, and its people bring broad applications expertise with a strong focus on finding local solutions to the world's most challenging water and wastewater problems. Xylem is headquartered in White Plains, N.Y., with 2012 annual revenues of \$3.8 billion and 12,500 employees worldwide. In 2012, Xylem was named to the Dow Jones Sustainability World Index for advancing sustainable business practices and solutions worldwide.

The name Xylem is derived from classical Greek and is the tissue that transports water in plants, highlighting the engineering efficiency of our water-centric business by linking it with the best water transportation of all -- that which occurs in nature.
